Professional Summary

At Holberton, I honed my skills in Linux, programming with C, C#, and JavaScript, and managing MySQL and PostgreSQL databases. During my tenure at Superpower Labs, I've developed proficiency in building ReactJS web applications and creating RESTful APIs for PostgreSQL databases, often under tight deadlines. Additionally, I've conducted extensive testing and debugging of Solidity smart contracts, enhancing their reliability and performance.

Work History

Superpower Labs - Junior Software Engineer
Bay Area, California
12/2021 - Current

- Specialized in designing RESTful APIs and backend functionality using JavaScript and TypeScript, coupled with expertise in PostgreSQL for robust database management. This experience contributed to the development of scalable and efficient software applications.
- Actively engaged in team meetings, regularly contributing innovative ideas and constructive feedback for design and process enhancements.
- Excelled in writing advanced, maintainable, and clean code, with a focus on JavaScript and TypeScript. Prioritized readability and reusability in code practices, facilitating effective collaboration, especially with cross-border teams, and simplifying future modifications.
- Proficient in applying object-oriented programming principles in diverse development environments, ensuring the creation of modular and responsive software solutions.

Census 2020 - IT Clerk
Mayaguez, Puerto Rico
02/2020 - 11/2020

- Reviewed documents and managed calls, ensuring precise information distribution and clear communication with office staff.
- Skillfully resolved IT customer queries, applying problem-solving expertise to ensure effective and timely solutions.

Languages

Fluent in English and Spanish
